PROJECTS

Memingo - Language Learning Platform Link — Sep '24 — Present

- Optimized leaderboard API performance by slashing response time from 30 seconds to **40ms**, eliminating user drop-off and enabling seamless real-time ranking updates.
- Engineered **real-time object detection** feature enabling users to scan everyday items and instantly receive tailored vocabulary sentences, cultural insights, and contextual learning tips delivering immersive, on-demand language acquisition.
- Designed and built **9 interactive lesson formats** catering to diverse learning styles, significantly boosting completion rates and retention.
- Integrated **Gemini API-powered** chatbot delivering personalized language-specific course recommendations and practice resources and accelerating average learner progression

Moodly- Experience Booking Platform — Aug '25 — Present

- Engineered real-time mood detection via **voice/facial recognition** with RabbitMQ event-driven architecture, delivering hyper-personalized daily experience recommendations boosting user satisfaction and retention through emotional-state alignment.
- Built seamless booking and cancellation workflows with one-tap actions and instant confirmations, reducing transaction drop-off rates and streamlining user experience flow.
- Designed adaptive feedback loop analyzing post-experience reviews to dynamically refine recommendation algorithms, increasing repeat bookings and enhancing personalization accuracy.
- Implemented voice-command interface enabling hosts to create and manage experiences hands-free, accelerating content onboarding with real-time backend synchronization via event-driven architecture.
